

## Hyflex praised by main contractor for two Marks and Spencer roofing projects

YOUR M&S

*"Thank you all for your hard work not only on North Street but also East Street. Both stores have been delivered to an exceptionally high standard I look forward to working with you all again in the near future."*

Tom Murphy - Project Manager, WB Projects

Working closely with WB Projects, Hyflex Roofing, using Hyflex Exemplar PMMA cold applied liquid waterproofing system completed two roofing applications during the expansion and refurbishment of the North Street and East Street, West Sussex branches of Marks and Spencer.

The North Street store, completed in November 2011, included the construction of an additional 8,000 square feet of retail space, whilst the East Street store was revamped with wider shopping aisles and a new coffee shop. The projects also helped to create **85 new** jobs at the high street chain.
